Description

The **Model 680** series is a set of small sized, light weight, and rugged HCMOS extended temperature/COTS crystal clock oscillators with 5.0, 3.3, 2.5, or 1.8 supply voltage for operations under stringent environments. They are used in applications that take advantage of their extended temperature range and tight temperature stability. They combine excellent long-term reliability, loading characteristics, and superior start-up performance.
